

Build Anything Better.™

THE EFFICIENT HYBRID HOME

TYPE OF BUILD ----- RESIDENTIAL

LOCATION ----- FORT RIPLEY, MINNESOTA

SIZE ----- 3,780 SQ.FT.

YEAR BUILT ----- 2018

DESIGN HIGHLIGHTS

This home was designed for retirement living and aging in place, and built to fit the owner’s specific needs for energy efficiency, quietness, protection from harsh elements and no exterior or interior steps. The home design features a large comfortable living area adjoined to large workshop and garage areas.

RESILIENCE, SUSTAINABILITY & COMFORT NOTES

All three zones of the entire building are hydronically heated. Each zone is permanently set at 68 degrees F and all three zones are comfortable despite the 14’ high walls. The monthly heating bills are about \$225 in the dead of winter.

“As the owner, I am extremely satisfied on all levels. This home has been highlighted in two construction magazines and a newspaper.”

Tom Gilson, Owner

CONSTRUCTION FACTS

This building was self-built by the owner, family and friends. The Logix walls for the entire structure were fully constructed in 6 days.
