### NOTES

- ci = continuous insulation.
- o.c. = on-centre.
- Modelling is based on C1 prescriptive package from SB-12 in the 2012 Ontario Building Code.
- Modelling was completed utilizing HOT2000 v11.9.
- Imperial U-values and R-values have been noted in this table.
- Estimated operating cost is based on an average of the Ontario off-peak, mid-peak, and on-peak electricity rates.
- This is a model only and is provided for illustration purposes only. Actual energy consumption will vary depending on lifestyle, location, orientation, air tightness detailing, and any number of factors.
