

**Building Type**......Multi-Family/Student Residence **Location**......London, ON

# RESIDENCE ON FIRST

 Size
 197,000 sq. ft.

 Year Built
 2014

## **Design Highlights**

This L-shaped, 14 story building features pre-cast floors and demising walls. Logix ICF was used for all above-grade walls, and the parking garage was conventionally formed.

#### **Construction Facts**

Projected start date was April, but the project did not start until August. As a result, this was a full-scale winter build in the midst of very cold and snowy conditions.

### **Resilience, Sustainability & Comfort Notes**

 This is the second ICF student residence building in the city of London, Ontario. It is located across the street from Fanshawe College.

"I originally met the architect to discuss Logix ICF for a residential project. The architect saw the value in Logix ICF and proposed it to the developer for this upcoming 14 story residence project. This has opened up a new market for ICF mid-rise buildings in Ontario."

- GRANT LITWIN, LOGIX TERRITORY MANAGER
