

THE PEERLESS TROUT SENIORS' HOME

Building Type.....Residential
Location.....Peerless Trout, AB

Size.....988 sq. ft.
Year Built.....2018

Design Highlights

This home is designed with Logix ICF Platinum Series (R-28) with additional thermal performance added by foam inserts. Logix Pro Buck™ was used to frame all of the openings for additional thermal stability, and Heat-Sheet® under-slab insulation completed this net-zero ready envelope.

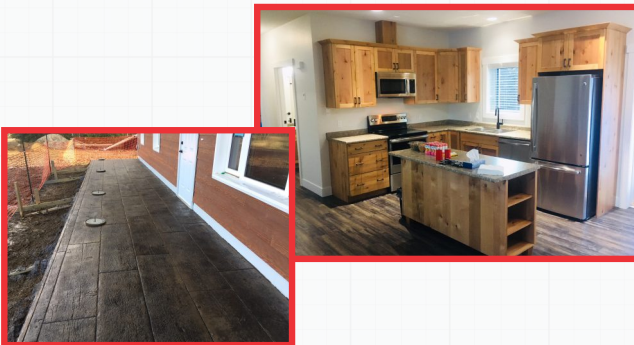

Resilience, Sustainability & Comfort Notes

- This home is rated to use less than 10% of the energy of a regular home. It is mold-resistant and fire-resistant and incorporates a radon-mitigation system.
- “We believe the introduction of Logix ICF to the region promotes net-zero construction, energy-efficiency, self-reliance and healthy, comfortable living. It is a 100+ year, 7-generations approach.”

■ - CHRIS MARACLE, DESIGNER

Construction Facts

The Logix ICF walls were built in 1.5 days by an in-house crew that was trained and extensively supported by their Logix dealer. The crew had not built with ICFs before..
